CLARENCE SMITH

—)AND(—

Miss Minnie Rouchelle,

—)CHAMPION LADY AND GENT.(—

BicycleRiders

Of America, will give an exhibition of fancy riding, including many new and wonderful movements.

Mr. Smith

Will make a special exhibition on one wheel at the race track this afternoon.

Admission - - 10c.

Skates - - 10c.

The Ypsilantian.

ROLLER RACE.—There as a large crowd at the Arcade rink st evening to witness the five-mile e between Harry Haskell of Tole and Free-man Ward of this city. e race was easily won by Ward in 1 minutes, notwithstanding the fact at he lost a lap by the breaking of a te, near the end of the race.

AUGUST WEATHER.—Ard Man-sill, the Illinois weath ophet, gives the following as his tions in re-gard the weather tha be expected during the present m "The tem-perature will likely av about or a little below the m both in the United States and Europe—during the first week of the month, and perhaps a v little above the last ten days. It is t expected to be as stormy a month a nly. In fact the last half of the m th should be pleasant weather. Th worst storms should occur from the to the 12th, with perhaps one about e 21st, and a few from the 24th to th 7th."

A CRUEL FIRE.—T alarm of fire about half-past one o'c k last Saturday morning was cau by the burning of the humble res nce of Wm. King, an elderly colore sident of the first ward. The fire c any succeeded in arresting the slu s of all within sound of their un ical bell, but after so doing conclu there was no water in the vicinity the diminutive conflagration, so retur the engine to the house and hied th selves to their homes. The building as entirely destroyed and but litt of its contents saved. Mr. King is a nvalid at present, and his wife, ev before losing her home, has had a h struggle for existence. Truly it w a pitiless blaze that robbed the poor lored couple of their home and furnit e.

CHURCH SERVICES.—The Rev Mr. Grannis was again u le to all his appointment at the u n service, last Sunday evening, and e services were held in the Baptist urch, the Rev. Mr. Springer occup g the pulpit. The sermon given wa ne of the most earnest and impressi ever delivered from an Ypsilanti lpit. The reverend gentleman unsparingly denounced dancing, th es and horse-racing, and although y in his large audience might n fully agreed with him, all were with his intense earnestness and pleased with his frank, fearless utterances.

—The union services next Sunday evening will be held at the Methodist church, Mr. Grannis confidently expecting to have recovered his voice sufficiently to deliver the sermon.

RINK MANAGERS' ASSOCIATION.—At a meeting of the rink managers of the state, held in Detroit, a short time ago, in which the Ypsilanti rink was represented, the Michigan Rink Manager's Association was formed. The object of this association was stated to be the elevation of the skating rink business generally, and especially to put the business on a moral footing which will be beyond criticism; to adopt rules and regulations to accomplish that result and to establish an attraction bureau whereby only first class attractions will be given to the public at a price that will be profitable to the management. No professional is to be allowed to appear at any rink in the association except through the association, although local attractions are to be encouraged. The secretary of the association is to have full charge of the hiring of attractions. A suggestion that met with much favor was that tickets be issued admitting a parent free when children's tickets are purchased. A rule was suggested, and will be generally adopted, expelling any man from a rink who asks a lady to skate without first having an introduction.

Max Pease can walk when he wishes. He walked out from Detroit one day last week, being on the road from 9 a. m. to 8 p. m. and then made a call or two after arriving here.

Judge Joslyn and wife will reside on Fifth street, Ann Arbor, for two years commencing with the fall term of the court. Mrs. Joslyn is contemplating a trip to Denver, Col.

Mrs. Tyler, mother of Prof. Moses Coit Tyler, of Ithaca, is visiting at Mrs. Cowell's on Mill street.

Miss Mary Putnam left Sunday p. m. for Mankato, Minn., where she accepts an important position in the city schools. Miss Putnam graduated last June from the literary department of the University, where she made for herself a high record as a brilliant student. Miss Putnam will be missed from social and literary circles here.

Dayton Parsons, formerly in the drug store of E. Samson, and later, cashier in Mabley's clothing house, Detroit, has now taken a position as traveling salesman for the manufacturing drug firm of Frederick Stearns & Co. of the same city. His route will comprise southern Michigan.

Geo. Spencer and wife of Charlotte, and Clarence Spencer and wife of Carbondale, N. Y., are visiting their parents, Mr. and Mrs. E. M. Spencer.

For Sale.

Residence No. 46, North Huron St. Call and enquire for terms of T. S. Finley.

The Races.

A Splendid First Day—Close and Exciting Contests—Accidents and Incidents.

The first day of the Ypsilanti meeting was ushered in under very favorable circumstances. Better weather could not have been desired, and should the Association be similarly favored throughout the meeting they will have much cause for thankfulness.

The number present was fully up to the expectation of the managers, and they are consequently much elated over their prospects for a successful meeting as regards attendance.

THE FIRST RACE

was in the 3-minute trotting class for a purse of $300. There were fourteen entries on the score sheet for this race, and ten of them responded to the tap of the bell. The sight of such a magnificent field was inspiring to the many old turfmen present.

When the word was given Sickles' Hambletonian took the lead and held it until turning for the home stretch, when he collapsed and was easily passed by George T., the stallion taking second place.

The second heat in this class was marred by an accident. When nearing the first quarter-pole Sickles' Hambletonian broke badly, and throwing the sulky to one side it was struck by Pawnee, throwing the latter and causing her to retire to the stable. Hambletonian freed himself from the debris and finished the heat in a go-as-you-please style, galloping around the track without sulky, driver or harness. The heat was won by Jessie B.

When the bell was tapped for the third heat Hambletonian put in appearance but Pawnee failed to show up. The nine horses got off in a line. Hambletonian again went into the air at the start, but secured himself finally and passed under the wire a good third, Jessie B, taking first place and Frank S. second. George T. passed under the wire third in this heat but was set back to fourth place by the judges as a penalty for running.

The fourth and last heat was also won by Jessie B. The send-off was not the best, two or more of the horses being off their feet when the word was given, but as they soon recoverd the result was not affected. The summary of the race is as follows:

3:00 CLASS, TROTTING—PURSE $300.

Frank T.	8	5	3	9
Jessie B.	5	1	1	1—1
Ianthie	3	4	7	4—4
Frank S.	9	8	2	5
Almont General	4	2	5	2—2
George T.	1	3	4	3—3
Sickles' Hambletonian	2		6	8
Sylvia	10	7	9	7
Pawnee				
Purifier	6	6	8	6

Time: 2:32¼, 2:35, 2:36½, 2:35¼.

THE SECOND RACE

was for pacers in the 2:50 class. There were six entries, Excelsior being the favorite among the knowing ones, or at least among those who were supposed to be the knowing ones. Their prophecy, however, was accompanied by the information that his driver might not attempt to win the race as he wished to retain his class position. The heat was won by Davy Crocket, Excelsior taking sixth place.

The second heat in this race afforded the prettiest race of the day, between Jim Blaine and Davy Crocket. Blaine secured the lead at the start and held it until after passing the last quarter-pole, when Davy Crocket pushed ahead and kept that position until passing the wire. It was thought by the aforementioned knowing ones that Blaine could have held the first place if he had been urged.

The feeling that Jim Blaine and Excelsior were not being driven to win finally reached the judges' stand, and a change of drivers was ordered, Wm. McLaughlin being placed behind Jim Blaine and A. T. Fleming behind Excelsior. The third heat proved there was some truth in the suspicion as far as Excelsior was concerned, as he took the lead before reaching the first quarter pole and held it to the end. The result of this heat was received with enthusiasm and cheers from the grand stand.

The second accident of the day, occurred in the fourth heat of the race. Just after passing the quarter-poleDavy Crocket was seen to stumble, and horse and driver turned almost a complete somersault. This incident caused much excitement for a time, as it was feared that the driver had been injured by the fall. The fear was soon dispelled by the latter's appearance, and it was afterwards ascertained that both driver and horse escaped with comparatively trifling injuries. The heat was won by Excelsior, Joe Bowers taking second place.

Davy Crocket was roundly cheered when he appeared on the track to start in the fifth heat, and he gallantly responded to the ovation by winning the heat and race. Excelsior, from whom much was expected, broke before reaching the quarter-pole and passed under the wire at the end of the long line. The positions of the several horses in this race were as follows:

GLASS 2:30 RACING—PURSE $250.

Little Tony	4	5	3	5	4
Excelsior	6	3	1	1	6
Jim Blaine	3	2	6	3	3—3
Davy Crockett	1	1	2	6	1—1
Joe Bowers	5	6	4	2	2—2
Daniel S.	2	4	5	4	5—4

Time: 2:36¼, 2:27, 2:26¼, 2:36¼, 2:29.

THE THIRD RACE

Was a half-mile running contest, best two in three. Sorrel Dan seemed to be the favorite, but the expectations of his admirers were doomed to disappointment. The race was won in two straight heats by Leamington, though in both heats Dan was a very close second. There seemed to be much rivalry and some bitterness between the owners of Leamington and Dan, and the fact being known to the spectators added unusual interest to the race. The several positions of the racers were as follows:

RUNNING RACE HALF MILE HEATS—PURSE $200.

Leamington	1	1—1
Alcina	3	2—3
Lottie Kempster	5	5
Sorrel Dan	2	2—2
Jim Town	4	4—4

Time: 51 seconds, 51½

It was a few minutes past seven o'clock when the last heat was finished, and although the racing had been the finest ever seen on our track, the spectators were glad when it was concluded. Arrangements will be made this afternoon to have the heats called more promptly and to conclude the races by six o'clock.

NOTES.

D. S. Campau of Detroit, the starter and chief official in the judges' stand, proves himself the right man in the right place. He possesses full information of all matters connected with the track, and his decisions are given promptly and decisively.

Two accidents on the first day might be considered a bad beginning; but when the fortunate outcome of what might have been serious mishaps are taken into consideration, it would seem that the meeting is starting under fortunate auspices.

More than one hundred ladies occupied seats in the grand stand.

John W. Webster of Detroit, Dell McLane of Bay City, who has recently returned from a trip to Central America, and Daniel Quirk, Philo Ferrier, and David Uhl, of Ypsilanti, honored the reporters' gallery with their presence yesterday afternoon.

The following are the entries for today's races. It is a splendid field, and should the weather prove favorable some good races may be expected.

2:40 CLASS.

Lady M. b. m., Wm. Enos, Jackson, Mich.
Montague, b. g., J. L. McCarthy, Detroit, Mich.
Orphia, b. m., Walter I. Haynes, Clinton, Iowa.
Ed. Mac, br. g., Nathan Lindsey, Grand Rapids, Mich.
Montague Boy, ch. g., Wm. Sharp, Muskegon, Mich.
Maud R., b. m., C. C. Pond, Jackson, Mich.
Glass Gow, ch. s., Geo. Canrike, Union City, Mich.
Huron Boy, ch. g., A. I. Fleming, Bay City, Mich.
Rip Van Winkle, b. g., Ed. Lenheim, Saginaw, Mich.
Belle of Shelby, g. m., D. C. Pearsall, Disco, Mich.
Topsy, ch. m., C. G. Crofort, Detroit, Mich.
Frank S., br. g., W. S. Norton, Bristol, Ont.

SECOND DAY—2:28 CLASS.

Wm. S., blk. g., C. E. Bennett, Jackson, Mich.
George R., dun. g., W. W. French, Springville, N. Y.
Pet Ike, g. g., Philo Sweet, Kalamazoo, Mich.
Maggie R., br. m., Wm. Sharp, Muskegon, Mich.
Mollie R., b. m., E. L. Carmichael, Tama City, Iowa.
Wade Hampton, ch. g., Frank Filer.
Ham Morrison, br. g., C. C. Pond, Jackson, Mich.
Irene, br. m., W. S. McLaughlin, Detroit, Mich.
Dr. Frank, r. g., F. B. Galbraith, Pontiac, Mich.
Hambleton, b. s., A. H. Kortlander, Grand Rapids, Mich.
Little Joe, br. g., W. W. Lewis, Ypsilanti, Mich.

SECOND DAY—ONE MILE AND REPEAT, RUNNING.

Elexor, ch. g., entered by E. Bowers, Chicago, Ill.
Vernor, b. s., R. Waters.
Chinchilli, ch. g., Chas. H. Hurdick, Cleveland, Ohio.
Exploit, b. g., Chas. St. Clair, Indianapolis, Ind.
Alcina, b. m., Thomas Gleason, Jacksonville, Fla.
Tillie S., b. m., D. A. Brollier, Harrod, Ohio.
Temptest, ch, s., C. W. Beecham, Grand Rapids, Mich.
Billie G., ch. g., C. Hodges, Grand Rapids, Mich.
Athelstane, b. g., Cornelius Sullivan, Riverside, Ill.
Baritone, b. g., G. W. Sheldon, Clymer, N. Y.
Anthony, b. s., Jno. M. Matthewson, Lowell, Mich.

Mere Mention.

A list of the visitors at the Sanitarium will be given in our issue to-morrow morning.

Twelve carloads of hard coal are being unloaded into the basement of the Union school building to heat the rooms next winter.

We are indebted to Mr. and Mrs. C. R. Pattison for compliments accompanied by some choice samples of wedding cake. Our Commercial friends can be assured of our gratitude.

We learn from a letter head on which Walter T. Busby writes us for the four issues of THE DAILY YPSILANTIAN, that "Clack" as he was called when here, has succeeded R. E. French as postmaster of Fort Gratiot, Mich.

"Nobody's Child," was delayed in its presentation at the Opera House last evening, owing to the failure of two of the company to arrive from Detroit until near nine o'clock. The manager promises a good entertainment and no delays this evening.

Manager Curtis has thus far booked the following attractions for the Opera Housh the coming season: Nat, Good win in either; "Fun in a Photograph Gallery" or "The Skating Rink;" Joaquin Meller's "Forty Nine" for three nights during the fair; Mortemer Murdock's "A Brave Woman;" 'Hobbies' Cemedy Co.: Lester Allen's "Big Minstrels;" Marston's "A Wife's Honor;" Madame Rhea, William Scanlan, "Silver King." Other troupes are waiting for dates daily.

Sunday evening at about 10:30, Officer Stuck heard a pistol shot near Congress street bridge and later two more at the corner of River street. The parties who did the shooting on being pursued ran out of reach. Examination proved that one of the balls had gone in at an open window in the house of Thos. Reader and shattered a picture on the opposite wall. A few moments before, there had been two persons sitting at the window. The perpetrators of such lawless actions should be sought out diligently and shown no mercy.

City Census.

Facts Gained by Our Enumerator Regarding the First and Second Wards.

The first ward comprises the tract of land lying south of Congress street and west of the river. It stands second in the city in point of population being surpassed in that regard by the fifth. It stands first in the number of colored people having 56 families of them, making 250 individuals. The whole population of the ward is 1165, against 1189 last year. These are distributed in 298 families. Some of these contain as high as ten and twelve members, others have only a single representative. Of these 298 families, 105 are republicans; 85 democrats, 13 prohibitionists; 4 greenbackers; 4 independent republicans, and 87 don't care one way or the other. These figures will not profit the office seeker much, for many of the families contain two or three voters, while some do not contain any. This ward contains nearly four hundred children of a school age, white and black. There are fifty-one marriageable young ladies between the ages of 18 and 25, and there are eleven maidens who are just sweet sixteen. The ward has generally been considered republican but elected a democratic alderman last year by 3 majority.

The second ward was originally shaped like an axe head being compused in the slanting of Chicago avenue and Ellis streets. By a change of boundary made some years since, this ward now lies between Congress and Ellis streets. The state census last year gave the ward 880 inhabitants. Our enumerator has discovered 910, of whom 41 are colored. These are comprised in 203 families, who live in 202 houses. Of these families 70 boast of being republicans; 54, democrats; 16, prohibition; 3, greenbackers, 3 Independents and the remaining 77 don't care. This is the banner ward on this side of the river for good looking girls. There are 8 of them 16 years of age and 48 between 18 and 25. This section has 223 school children.

Personal.

Angus McFarland is spending his vacation here.

Howard Stephenson is in Ypsi. on a week's vacation.

Miss Anna Cutcheon, formerly one of the Normal Faculty is in town.

Hon. C. R. Whitman is in Lansing to-day, will return this evening.

Miles Parker, ex-manager of the Arcade rink is in town during this week.

Darius Shuler, Forrest and Ed. Gillette are camping at Portage lake.

Minnie Stoup is visiting friends at Foster's, above Ann Arbor.

The city's new fire department barn has passed the first story.

Mrs. Nellie Yerkes left Monday for a week's visit at Northville.

Albert Miller an extensive mill owner of Bay City is visiting in town.

Mrs. H. S. Whitcomb is visiting her sister, Mrs. Prof. George.

Miss Cora Randolph of Flint is the guest of Miss Maggie Wise.

Oscar Gates, Aurora, Ill., has been visiting T. B. Babbitt.

Fred Robbins leaves this morning for a pleasure trip in northern Michigan.

Mrs. L. P. Forbes is visiting at Flint; from there she will go to Augusta, Georgia.

Mr. and Mrs. Geo. Foote of Ellis street, are making a two week's visit to Battle Creek.

Miss Maud Perrin of Bay City is visiting Mamie Wallace, Prospect street. Miss Perrin's father was the M. E. Pastor here some years ago.

Don Seymour is spending the summer with his sister, Mrs. A. L. Braisted, at Grand Rapids.

Miss Francis Stewart will take her vacation the last week of this month. Geo. B. Hodge will do duty behind the postoffice window during her absence.

Miss M. A. Fletcher, formerly preceptress in the High School here, was in town Friday.

Henry Platt, now of Muskegon, is taking a short vacation with his old friends here.

Mr. and Mrs. Frank Stowell will spend two weeks' in Buffalo; they leave Saturday.

Grace Vinton, an estimable young lady of seventeen years, daughter of N. G. Vinton a former resident of this city, who lived in the Laible place on the plains, was buried in Detroit Saturday.

Misses Eliza Stewart and Jennie Moore are spending two weeks at Wampler's lake, twelve miles from Manchester.

M. S. Hall has sold his property near the corner of Pearl and Perrin streets to Mail Agent R. Norton, and will fit it up for him.

Prof. Austin George leaves Saturday for a two weeks stay at Adrian doing institute work.

Miss Carrie Parker is visiting friends at Homer. Miss Flora Parker is visiting in Detroit.

The wood work of the opera house has been repainted and improvements made in the ventilation of the house. The steam coils have been extended into the flues in order to create a regular draft and a steady supply of fresh air.

Marian A. Chase, Ann Arbor, a preceptress of the Baptist church at Kalamazoo was in town Friday.

Mr. and Mrs. Chas. Hewitt have just returned to their home in Knightstown, Ind., after a three weeks visit with Mr. and Mrs. Walter Hewitt of Huron street.

THE DAILY YPSILANTIAN.

WEDNESDAY MORNING, AUG. 12.

Is This Life All?

Christian Register.

Is this life all? Is there, then, no clearing day, no balancing, no giving and taking of credits, no squaring up of accounts? Is it all a hopeless muddle, this life of ours, nothing ever finished, all hurly-burly, all contention, all rival claims, all a weary waste of effort to no conclusion? Shall we drop our tools and hurry away from our work, when we are called, to find no table spread for us, no home opening its door for us, no anything? Do we drop out and keep on dropping out,suns and moons growing cold and wearing out, all for nothing? I think not. We live. And, just here, there is an idea pertinent to this question of immortality that I do not remember to have seen insisted upon. Perhaps it is because it is so self-evident that nobody ever thinks of mentioning it. It is this. What does it matter to us where we are? We come and go, live everywhere, in arctic colds or tropic heats, in the track of the anuual tornado, on the slope of the volcano, over the ruins of earthquake buried cities, on the decks of ships in stormy oceans, in quiet valleys on the land,breathing the poison of malaria: we all live and wonder at the rest of mankind for dying so [illegible] we never even think about it! And we do not ever mean to die.

'All men think all men mortal but themselves.'

How soon we forget our surroundings! How soon we realize that we are immortal, when we close our eyes and do nothing! Does the mind do nothing? Never. What is it then? What are we? Does to-day or to-morrow or yesterday make any difference to us? Does here or there make any difference? Transplant us to the strangest clime,—what of it? Are we not ourselves? What shall take this sentient self away from me? Can death do it? It seems to me that our whole being answers this question. We never question it. Our life is a matter of course to us. We sleep and wake in a full consciousness that we still are, and will continue to wake when we lie down to pleasant dreams. The whole theory of our consciousness seems based upon it. If it were not so, I would have told you, says the Master to his disciples. If it were not so, we should have been told of it. But we are not told of anything but life. Look at the blossom. Does it not know its time to fade, to wither, to drop its petals? Look also at the fruit. It ripens and then drops in full maturity. But we, what do we? Are we ever ripe? Does the withering time ever come to us? Though never so infirm, though never so blind, or deaf, or halting, who of us ever calls this his infirmity, this wasting of power? It is only some part of a machine that he is more or less interested in that is out of order. The poor, old machine may be past repair, what matters it? He will make it answer his purpose as long as it will. It may not run long. It has done him good service, and he will oil the old journals and polish the brasses for the good it has done; but it must soon be laid on the shelf, and then what? The owner of it is then ready to answer the call of his Owner for the next day's work, He feels his readiness. He feels, perhaps, that he is laid up in ordinary, and will need a good deal of overhauling; but he feels no consciousness that he will not run on. Nothing tells him to stop. Hope calls him forward. There is an expansivness in this hope, which is so real that, even while the pains and chains of his mortality are upon him, he draws a full breath of spiritual life, and knows that a new machine, a new embodiment, is in waiting for him.

WM. J. CANBY.

Washington, D. C.

Three Gems.

Editors YPSILANTIAN:

From Mr. Springer's splendid oration on Grant, at the opera house, I culled three gems, viz:

"No lofty height can be attained in a descending path."

"Manhood is mightier than circumstances."

"No one knows his undeveloped resources."

E. R. E. COWELL.

"Personal Memoirs of U. S. Grant."

This book is written in the first person, entirely by Gen. Grant himself, and is the only one which he has ever written, *or in which he had any interest whatever*. We emphasize this that the public may not be deceived by cheap imitations which are sure to follow this work, some of which will be so ingeniously advertised as to appear to be the genuine. John W. Wise, of this city, is the only authorized agent for Washtenaw County.

Over One Thousand of the *best books*, by the best authors, can be bought for 10 to 20 cents each, at Rogers', next to P. O. Call for catalogue.

A. A. Graves is not the handsomest man in town, but he sells the Best and Cheapest Coffee, and by so doing, has become a great favorite with the ladies.

Full line of Winsor & Newton Oil Colors constantly on hand at C. W. Rogers', next to P. O.

Do not forget to send your orders to the Owen Mineral Well of Ypsilanti.

Have your eyes tested and buy a pair of Rock Crystal spectacle or eye glasses, warranted to give satisfaction. C. W. Rogers sole agent.

In another column will be found an interesting literary production from the pen of A. A. Graves, the Grocer. Read it.

Call in and look over our 5c Music—200 pieces to select from at Rogers' Book Store.

Do not forget to send your orders to the Owen Mineral Well of Ypsilanti.

Big Bargains in Albums and Cabinet Picture Frames, this week at Rogers', next to P. O.

SPRECKLESVILLE.

VISIT TO THE LARGEST SUGAR PLANTATION IN THE WORLD.

The Story of Claus Spreckles' Success as Written by a Honolulu Correspondent — Machinery, Labor, Cultivation, Yield of Sugar, Etc.

[Professor Wayward in Hartford Courant.]

But what and where is Specklesville, and why should it be visited? It becomes me to answer this quite natural question without any parade of superior information, because two months ago I knew as little about Specklesville as the average Specklesvillian knows to-day about Hartford. It has a familiar sound, akin to Tariffville or Falls Village. In point of fact, it is a small settlement with a polyglot population—Chinese, Portuguese, Japanese, Hawaiians, South Sea Islanders, Americans, Norwegians, Germans, English, Scotch, on the island of Maui, one of the smallest of the Hawaiian group, all engaged in the manufacture of sugar on the largest plantation in the world. About $2,000,000 have already been expended in the plant. The machinery, (all made in the United States) is of the most recent and most approved pattern, the management is intelligent and progressive, the annual yield is enormous, and the whole is the growth of only five years.

The area under cultivation is about 10,000 acres. One-quarter of this is planted every year from July to October. Single joints of the cane, each containing an eye (very much like the eye of a potato) are planted at intervals of twelve inches and lightly covered with soil. During the period of growth the trenches are weeded as often as may be necessary. The most serious problem is how to obtain an adequate supply of water. The average rainfall is very uncertain, as may be inferred from the fact that it varied from 18.71 inches in 1878 to 31.78 in 1884. The planter must rely, therefore, on artificial irrigation. The Spreckles plantation is watered by two ditches, the principal one twenty miles long, fourteen feet wide at the bottom, and six feet deep, with sidings to supply water to the trenches at the rate of from 14,000 to 16,000 cubic feet to the acre each week. The cost of this ditch was about $250,000.

Cutting cane for the mills commences in January and goes on until the fields are cleared, the time required for bringing the cane to maturity being from fourteen to eighteen months. Of course, every practicable expedient is adopted for diminishing the amount of manual labor. Twenty miles of narrow-gauge road traverse the plantation, the track being changed as the work goes on, so as to reduce the carrying by hand to the minimum. The cane is then transported to the crusher, which, fed by an endless chain, grinds up (in the three mills) about 800 tons of cane per day, resulting in a daily yield of about eighty tons of sugar.

The yield of sugar to the acre varies from three to six tons—depending on the fertility of the soil, the thoroughness of cultivation, and the perfection of the irrigation. Perhaps four tons would be a fair average. The waiting line of between 200 and 300 cars loaded high with cane and discharging their contents into the insatiable throat of the crusher presents in a very vivid manner the magnitude of the enterprise. The juice of the cane so extracted is then clarified, and boiled and vacuumed, and centrifugal-cylindered over and over again until it reappears in three qualities of sugar. The final residuum is a coarse, gummy molasses, without market value. The very competent manager of the Spreckles mills—whose salary is nearly three times the pittance paid to a professor in Yale college—is seeking by some chemical combinations, which promise to be successful, to convert this residuum into a profitable fertilizer. The "trash," as the fiber of the cane after the crushing process is called, is used for fuel.

A word as to the kind of labor employed. I have already indicated the various nationalities represented in the enterprise. The men filling the more important positions are Germans, Americans, and Englishmen. Of the common workmen, of whom there are more than 1,500, about 900 are Chinese. Also, from these industrious and thrifty people come the store-keepers, the dealers in opium and liquor, and, of course, the laundrymen. The natives do not love to toil or to spin. Continuous labor is especially irksome to them. They work, as a rule, only as they are impelled by the pressure of poverty, and this pressure is rarely severe, as they live on raw fish and poi, affect little variety or extravagance in their wardrobes, and crave simply such an accumulation as will purchase a horse and saddle and bridle.

Hence how to obtain an adequate number of workmen has become a very puzzling problem with the planters, especially as the Hawaiian government has practically prohibited any further importation of Chinese. Within recent months recourse has been had to the Portuguese of the islands of St. Michaels and Madeira, to the South Sea islands, and to Japan. About 1,000 Japanese are already under contract to come to these islands. The objections most frequently urged against the Chinese are alleged not to exist in the case of the Japanese, who are industrious, facile, companionable, quick to take in the customs of civilization, are eager to come, and not desirous to return to their native land. The South Sea islanders are only fitted for the more common forms of menial labor, and show no desire to improve. The Portuguese experiment cannot be considered a failure—the men are on the whole temperate and industrious, the women are prolific, conspicuously so, but they are not intelligent, and their ideas of ownership need to be essentially modified. They are quite too much given to reaping when they did not sow.

I have not yet alluded to Claus Spreckles, the originator of the sugar industry which bears his name and in which he is the principal proprietor. Although a German by birth, he has lived in San Francisco since boyhood, and in all his tastes and sympathies is thoroughly identified with the land of his adoption. I have alluded to the fact that all his machinery was manufactured in the United States, as were, also, his admirably equipped steamers the Mariposa and Alameda, plying between San Francisco and Honolulu. The enormous annual yield of sugar, not less than 10,000 tons, the product of the Spreckles mills, is brought by rail to the little harbor of Kahului, shipped on sailing vessels, and transported to San Francisco, where the immense sugar refinery of Mr. Spreckles receives and converts it into those white squares which have so so thoroughly displaced the tall, shining cones, enveloped in blue paper, which are among the memories of our childhood.

Jud Lafagan: To many, every pound of kindness weighs but sixteen ounces, while every ounce of meanness weighs sixteen pounds.

The Finley Wheat.

A new variety, is unusually hardy, standing the severest winter under late seeding; bald head; tillers well and is from seven to ten days *earlier* than any other variety, yielding, under favorable circumstances, from 40 to 50 bushels per acre.

For single bushel - - $2.00.
Over 2 and under 5 - 1.75. per bu.
Over five bushels - - 1.50. "

Delivered at nearest R. R. station.

Ypsilanti's Wonderful Water!

Its Curative Properties as certain to Revolutionize the Custom of going abroad for Mineral Bathing purposes as that American Institutions have Revolutionized the World Politically

READ AND LEARN

That, no matter what your disease may be, whether produced through blood poison or climatic influences, it CAN POSITIVELY BE

CURED.

THE YPSILANTI MINERAL SPRING.

This Mineral Water has now been on the market three years without a parallel in the history of wells in the United States. Its success is without a parallel in the history of wells in the United States. Its sales have been a continual, steady demand, from Maine to California. The initiation as a valuable water was an accidental trial for cancer, supposed to be incurable. The cure was completed in two months, and shows no signs of returning. The remarkable results in cancer cases have surprised the medical fraternity, and has grown to immense proportions. The remarkable results in cancer cases have surprised the medical fraternity, given relief the sufferers never supposed could be obtained. Over 100 car-loads of thousands of barrels have been shipped to all parts of the country. The local demand has grown to immense proportions.

The demand for bathing purposes, in addition to the shipments, kept the pumps at the well working to their utmost capacity. A larger engine became a necessity, which has been completed during the past year.

Owing to this unlooked-for demand the Mineral Bath Company drilled a new well for their bath-house, and struck a similar water at 959 feet in solid rock in the month of September, 1884, thereby relieving the original well from the draught necessary. Water from both wells is used at the bath-house, giving it facilities never before offered. The New Bath-House has now been open over one year. Its success has proved far beyond the expectations of its owners and it has been remarkable in curing diseases of the system in cases where a cure was supposed to be impossible.

The cases where the patients were brought on stretchers, crutches are counted by hundreds, and now walk the streets without a shadow of their former infirmities.

The commercial travelers seek the bath-house, and find relief as found in no other way. Scarcely a day passes that from one to ten of this valuable class are not found taking a rest and enjoying the mineral baths, that become necessary from their exposure to the inclemency of the weather and hotel life.

Situated on the great trunk lines, Michigan Central and Lake Shore railroads, Ypsilanti has become a well-known "place of rest."

Herewith We Give A Condensed Statement of A Few Sufferers.

YPSILANTI, April 9, 1884.

I came to Ypsilanti on the night of Thursday, March 27, suffering from inflammatory rheumatism in the wrist to that degree that I could get no sleep. Friday night, after one bath, I slept well; and on the next day the disease went to my knees and ankles. Monday I was again able to walk, and since then I have improved rapidly, until now, after taking twelve baths at the Ypsilanti Mineral Bath House, I am perfectly well, and able to leave for business. A. BRIDGMAN, Berlin, Wis.

A. A. ELLIOTT, Superintendent Bathing Co. DETROIT, MICH., Sept. 7, 1884.

DEAR SIR.—Had been troubled with inflammatory rheumatism for five years, but since taking a course of only twelve baths at the Ypsilanti Mineral Springs, the disease seems to have entirely left me. Can heartily recommend the water to all. Yours very truly, CHAS. W. PARKER, with Chas. B. Root & Co., Detroit.

MOORMAN & CORNWELL. YPSILANTI, Mich., Dec. 11, 1884.

It is with great pleasure I add my testimony in acknowledgement of the great benefit I have received during a fortnight's stay at the Mineral Bath-House. When I arrived, a sufferer from paralysis, heart troubles, indigestion, and general prostration of the nervous system, a marked improvement was perceptible after taking the first bath, and after taking the third was able to enjoy a night's natural sleep, which to me had been a stranger far months. At this writing, after using the water for two weeks, I find myself enjoying better health than at any time since my first attack of paralysis, over five years ago. Very respectfully yours, HENRY SLADE.

CHICAGO, Ill., December 24, 1884.

I have been completely cured of sciatica during the past three months by the use of Ypsilanti Mineral Water. I had been troubled to a greater or less extent for two years. C. D. PAINE,
Manager of Chicago Religious Papers for Lord & Thomas.

87 SHAWMUT AVE., BOSTON, Mass., October 7, 1884.

YPSILANTI MINERAL SPRING:

DEAR SIRS.—I feel it my duty to write and give my testimonial to the world that those afflicted with cancer and tumor may know what the Ypsilanti Mineral Water has done for me. Four months ago I was sent home from the hospital with a tumor in my side and one in the womb. The physician told me that there was no cure for me; that an operation would be sure death. My friend, Mrs. Moore, brought me some of the Water to try, and I got relief at once. I have continued to use the Water, and followed your directions, and to-day I have no tumor in my side, and no trouble with the other. I am able to go to my work every day. I sincerely recommend the Ypsilanti Mineral Water to be the best medicine in the world for those afflicted as I was. You have only to give it a fair trial to be convinced of its merit.
MRS. MATTIE ANN FORESTER.

YPSILANTI MINERAL SPRING:

I would say in relation to your Water, after giving it a fair trial, that for man woman or child with disordered stomach, or billious disorder of any kind, there is nothing on earth like it. H. H. EDSON, 2,721 Wabash Ave., Chicago, Ill.

BUILDING 60x138, with L 20x50.

THE YPSILANTI MINERAL BATH HOUSE

YPSILANTI, MICHIGAN.

MOORMAN & CORNWELL, Props. A. A. ELLIOTT, Superintendent.

This establishment is a model of elegance and neetness, comprising FORTY-SEVEN large, well ventilated bath rooms, kept clean and neat, elegant parlors for ladies and gentlemen, smoking and reading rooms, and all modern conveniences. The whole building is heated by steam, and each room is connected with the office by electric bells, while the force of employees is large and all needed attendance can be given when required. It is located in the heart of the city, one block from the principal hotels. Good board can be furnished adjoining the building, and there are a few large, well ventilated rooms, heated by steam, in the bath house, for the accommodation of patrons of the establishment.

MR. A. A. ELLIOTT, the superintendent, has had nine years' experience in mineral bath treatment, and, with a corps of competent assistants, the public can feel assured of receiving the best of care under his charge.

YPSILANTI MINERAL WATER

The water from the Ypsilanti Mineral Springs has been introduced to the public during the past two years. It has been tried and tested in a variety of diseases and has given universal satisfaction. The great strenght of the medicinal properties of the water makes it the cheapest and best ever offered to the public.

The Mineral Water, with its alkaline reaction, and its sulphate of Sodium, Potassium and Magnesium, its Bromide, Sulphur and Iron, is both a powerful tonic and an eliminator of miasmatic and blood poisons from the system.

It will remove Cancer, Erysipelas, and those bilious conditions which produce Inflammation and Fevers. It equalizes the circulation and regulates the heart's action. It purifies the blood by opening the pores and removing impurities, and revitalizes and tones the muscles and nervous system. We find it most effective in the cure of

SCIATIC AND MUSCULAR RHEUMATISM,	SLEEPLESSNESS, NEURALGIA, LUMBAGO,
PARALYSIS, INFLAMMASORY RHEUMATISM,	NERVOUS PROSTRATION, RHEUMATIC GOUT,
CATARRH OF THE HEAD AND STOMACH,	KIDNEY COMPLAINTS, INCLUDING BRIGHT'S DISEASE,
INDIGESTION, WITH TORPID LIVER,	SKIN DISEASES, ERUPTIONS, AND SALT RHEUM.
DYSPEPSIA, ST. VITUS' DANCE,	CONSTIPATION, THE ROOT OF MANY DISEASES,
GENERAL DEBILITY, SICK HEADACHE,	ALCHHOLISM,

PROTRACTED CONVALESCENCE FOLLOWING EXHAUSTING DISEASES.

Mineral water Baths, adapted to each case, are important to the treatment of Milk Leg, Prolapsus Uteri, Uterine Inflammation and congestion and all diseases peculiar to women. They relieve the sufferer from the distressing nervous prostration and weakness which accompany such troubles.

Inflamed eyes with Congested lids, Skin Diseases, Psoriasis, Eczema, Salt Rheum, etc., will yield to the power of the baths and the internal use of this mineral water in most cases.

We note also immediate relief from the paroxysm of Asthma and Hay Fever, with a speedy benefit in Bronchial Affections and diseases of the Throat and Lungs. The water has also been used with excellent results in cases of Piles, cures being affected in many cases.

Correspondence solicited. All correspondence strictly confidential. Address,

MOORMAN & CORNWELL, Ypsilanti, Michigan.

THE DAILY YPSILANTIAN.

WEDNESDAY MORNING, AUG. 12.

Our Bachelors.

Who They Are and Where They May be Found.

Their Personal Peculiarities and Prominent Characteristics.

BY A SPECIAL REPORTER.

As promised, we this morning continue the list of Ypsilanti's bachelors. The list will be completed Friday morning. Our first victim is—

CHAS. E. KING,

or "young Charley" as he is better known, is a mystery, that is so far as bachelorship is concerned. He is fine looking, in good circumstances, accommodating, a college bred man, no one ever saw him angry; but still he is not what his friends would have him, a man of family. Charles is a blond. over 35 years of age, dances, acts in private theatricals, is fond of excursions if they are for St. Luke's church, has had many good offers of marriage but refused them all.

REV. G. H. GRANNIS

Is thirty-five years of age. His appearance may be characterized as intellectual, his purpose persistent. He posesses the requisite qualites of a splen did husband, is not severely opposed to harmless amusements, but has well settled oppinions in regard to the kind. Croquet he believes in. There is no reason to suppose that he is confirmed in or fully satisfied with his present partial existence. He is probably looking for his spiritual affinity. He has one firmly fixed opinion in regard to family matters and that is that boys should go to bed early. No doubt he has others. Adams street is his present abode.

HAL. GLOVER

Is educating himself for a business partner with his father in the dry goods trade, but is nevertheless keeping his eye open for a matrimonial partner all this time. Hal is good looking, blushes frequently, thinks society and parties a bore, likes a good swim and a good row on the river, has bought a fine new boat, and that looks suggestive. He is going away next week, and what looks more suspicious, if any one asks him where, he intimates that it's nobody's business but Hal's.

JAMES WALDRON.

If Diogenes were alive now and came to Ypsilanti to find an honest man he would blow his lantern out and make for Jimmie Waldron. James has blue eyes and curly hair, never hurt anybody on purpose, laughs occasionally at a real good joke, but makes very few himself. When you see Jimmie walking north, he's going home; and when you see him walking south, he's going to the dry goods store of J. Kitchen, where he clerks. You seldom see him going anywhere else. Thirty-eight years is our estimate.

EDWARD GREEN.

This well-known Ypsilantian has seen thirty years of this cold world's bulleting, most of it in this classic city. He was a printer for several years, but had a natural taste for electricity. It runs in the family. He is now the manager of the telephone exchange, and has said "Hello" to more young ladies than any man of his age in town, yet still he marries not.

DR. HALL.

Ah there! He nearly escaped us but we will have one whirl at the man of baths before he has left our brotherhood for evermore. Considering the circumstances it would be ungallant to tell the doctor's age and we withhold it. He has black hair and eyes, a thoughtful expression, practices on the health list and never misses a meal. He knows what bachelor life is as well as any man in town and is dissatisfied with it. Many a maiden heart will twang in sorrow when the doctor steps out of reach and into matrimony.

ANDREW WHITMIRE

Has been running along the level track of life in single harness for thirty years. and more with a light foot and a merry heart. Military glory at first attractnd him, but the cares of business demanded his entire attention. He is now one of the firm of Terns & Whitmire, cigar makers and is a resident of that part of our city characterized as Dutchtown.

JOHN LAMB,

The familiar clerk in the store of Chas. King and son is twenty-six years of age. He is of about medium height, and is considered good looking. He is of an accommodating disposition and rarely talks about himself. No one knows why John remains a bachelor, perhaps he doesn't know himself.

ROB. HARRISON

Is a tiller of the soil in the country west of town, but a familiar personage in the city. He is thirty-one years of age, of a healthy, brown complexion. a critic in the matter of feminine dress and the care of a kitchen, would make a handy man to have about the house.

WILLIAM HYZER,

More familiarly known as Will, is the intellectual looking clerk in Dr. Morford's drug store. Twenty-three golden years have rolled away since William set foot upon this troubled earth. He is a graduate of the High School, a fine scholar, an officer in the Light Guards, a favorite among his friends, and has never been in love.

CHARLES MEANWELL

Is a young man of twenty-four, rather tall and commanding in build. His hair is black, and his eyes have a pleasant downcastness, indicative of their owners natural modesty. Lowell street is the thoroughfare on which Charles takes up his dwelling place and from which he goes forth daily with the brush and paint pot. No puns on the name allowed.

HOBART DAVIS

Has probably seen as much of the world as any man of his age in town. He is only twenty three, but has traveled from the gulf to the great lakes, from the east to the west. His more convenient title is Hope, a very suggestive word. He plays in a circus band and keeps both eyes open when he is playing his bazoo. He has breathed mellow tenderness to many a maiden through the plaintive picolo beneath her window playing, and still continues to breath it. Hope is steady, enterprising and affectionate. He will not marry an Ypsilanti girl.

BOB HOPKINS

Is a dark complexioned, strongly built youngfellow of three and twenty, is seeing as much of the world as his eyes will let him. He has pounded iron in Iowa, carried a surveyor's chain in Dakota and sold drugs in Ypsilanti. Just now he is catering to the public palate from the rear of Anderson's refreshment stand on the fair grounds. Look him over girls and be quick or you'll lose him.

FRED DAVIS.

Says he is twenty-five years old and has helped to serenade something over a thousand young ladies. He is the enterprising manager of Davis' Pharmacy on Congress street and one of the rising business men of the city. Fred does'nt drink, smoke, chew nor go to the skating rink, he plays upon the plaintive violin and upon the instrument of ten stops and two foot pedals. He admires pretty girls and has in his possession tokens of admiration received in return. He cares little for the rustle of silks in the ball room and finds more music in the fizz of his busy soda fountain. Fred is no chicken.

JOHN FOX.

Is a dark complexioned young man of twenty-nine, the law partner of Regent Chas. R. Whitman, a leading republican among his people, a player upon that soulful instrument the double bass viol. His matrimonial prospects are yet shady but our band will no doubt soon be obliged to say with the song, "Good bye John."

CHAS. ARNOLD

Is about twenty seven. His complexion, eyes and hair characterize him as blond. It would be a slander to allude to him as a dizzy blond, for his daily walk and conversation is steady and serene. He has a quick temper but is pretty well able to control it. He will make a good husband for some of the fair damsels in the vicinity of his farm a short distance east of the city.

FRED BUCHANAN

Is about twenty three years old. He is called by those who best know him, "Pet," a name indicative of his once mild and gentle disposition. He is at present engaged in selling groceries for Homer Cady and in trouncing the juvenile darkies who hover about the corner. Pet. will gladden some East side girl's heart some day.

JAMES BASSET

Belongs to south Washington street, but is seldom found there, being engaged as a traveling sales man for the drug firm of J. E. Davis & Co., Detroit. James is over thirty, handsome, entertaining company, well educated and a patriotic lover of his native place, so much so that we are justified in saying that he will marry an Ypsilanti girl some day.

To be continued.

For THE YPSILANTIAN.

SWIMMING.

An upraised dirty little hand,
Two fingers like a V,
A nod, a rush across the land,
A halt beneath a tree,

Two tattered hats upon the ground,
A lightning kick, a jerk, a squeeze,
Two suits of clothes heaped in a mound,
And in the water, tumbling round
Two aborigines. TWAM.

THE DAILY YPSILANTIAN.

WEDNESDAY MORNING, AUG. 12.

GHOSTS.

[R. K. Munkittrick in Atlantic.]

Out in the misty moonlight
The first snow-flakes I see,
As they frolic around the leafless
Limbs of the apple-tree.

Faintly they seem to whisper,
As round the boughs they wing,
"We are the ghosts of the blossoms
That died in the early spring."

Progress in Forrestry.

[The Century.]

Tree-planting is becoming almost universal on the great prairies of Minnesota, Dakota, Kansas and Nebraska, where it once was believed no tree would grow. Many causes have contributed to this remarkable result, prominent among them being the timber-culture act passed by congress ten years ago, amended in 1874 and again in 1878. Already 93,246 entries have been made, the area covered by them being 13,677,146 acres. Nearly one-fifth of this vast area was "entered" in 1882, which shows the growing influence of the princely premiums offered by congress and by many of the Western states to encourge tree-planting.

The timber act may need further amendment to prevent frauds, but recent inquiries of those who have had the largest experience and observation in Minnesota, Dakota, Iowa, Nebraska and Kansas convince me that its benefits have been so manifest as strongly to commend it to the people in those states. Many settle s have planted much more than the required ten acres in their 160 acres, or "quarter section." Said a Nebraskan: "We have thousands of trees, thirty to forty feet in height and eight or nine inches in diameter, grown from seedlings or cuttings planted less than ten years ago. The fuel problem is settled for many farmers. The trees and land are already worth three times their cost."

Mary and William as Names.

[Good Words.]

Mary was shown to be the commonest name of all. It distinguished 6,819 girls out of the 50,000 called as witnesses, and designated a larger number of individuals than any other appellation, male or female. William came next, naming 6,950 out of the numbers mentioned. The predominance of these two names may ere this have been rendered somewhat less striking than it was; but it is unlikely to have been largely modified.

A statement of the chief cognominal derivatives of William may interest some readers. There are Williams and Williamson to begin with. Then the abbreviation Will has produced Willes, Willis, Wills, Willson and Wilson. The diminutive Guillemot or Gwillot has led to Gillet, Gilliat, Gillet, Gillott and other forms, while Willamot, the more English version of that diminutive, has given Willatt, Willet, Willert, Willott, Wilmot, Wilmott, etc. Again, in connection with the pet shapes of the name are the surnames Bill, Billson, Bilson, Weeks, Wickens, Wickenson, Wickerson, Wickeson, Wilcock, Wilcockson, Wilcox, Wilcoxon, Wilkins, Wilkinson, Wilks, Willcocks, Willey, Willy and Woolcock.

Was Sorry He Spoke.

[Chronicle "Undertones."]

At Fort Bayard for a long time there lay an old spiked cannon, which had been rendered useless for some reason or another. The Apache chief of that district fell in love with that cannon. He used to come every day and beg the commandant to give it him. At length Gen. Sherman was announced as coming and the officer told the Apache that he must ask him for it. He did. The general looked at it, saw it was of no use and presented it to him.

"I am afraid," said the general, with mild jocosity, "you want the cannon so that you can turn it on my soldiers and kill them."

"Umph! No. Cannon kill cowboys. Kill soldiers—club."

The general was sorry he spoke.

Gen. Meigs.

["Gath's" Washington Letter.]

Yonder is rather a venerable man, with mind in his countenance and silence for his guardsman, who passes along in his carriage unnoticed. It is Quartermaster General Meigs, who hauled the Army of the Potomac, and, indeed, the armies of the whole Union, out of the mud and onward to the last ditch; and he has put up the patent office, the new pension building, and although a character of the past, his integrity has kept him alive and active to the present. He built the ball-room for Cleveland, as he built many a year ago the great arch on the Washington aqueduct, which contained the name of Jefferson Davis till Simon Cameron, or somebody, had it cut out of the stone, making it rather more prominent by absence than if it had remained.

Nothing Like It.

[Arkansaw Traveler.]

"I went to see a French opera while I was in New Orleans," said an old fellow who had just returned from the exposition. "Very fine, very fine indeed. I tried to catch one of the tunes, but as I don't understand French, I couldn't get hold of it. Oh, yes, opera is very good but I can stagger along very well without it. If I ain't particular about seein' a show, I'd just as soon go to an opera as a funeral, but when I want to lay right down and enjoy myself, I go to a circus. Ah, there's nothing like a brass horn and a hoss."

Some of Them Do.

[Boston Times.]

"Ma, aren't people who have crests and decorations of that kind supposed to be rich?"

"Yes, very often. They belong in old English families, who have coats-of-arms."

"Well, if they are rich, what do they want people to give them old clothing for?"

"Why, they don't. What put that in your head?"

"Oh, because you said they have coats-of-alms."

A Luxury.

[Life.]

"Father, what is a luxury?" asked little Johnnie the other night as he wrapped himself round the parlor stove.

"A luxury? Why, it's something we don't really need, you know—a thing we can do without."

"Well, then," replied the logical youth, "what a luxury a mosquito-net must be in winter."

Morning-Glories All Winter.

A lady in Indianapolis has had morning-glories blossoming in her parlor all winter. She placed, by accident, a small plant in a pot with some other plants and it continued to grow in the house. It soon blossomed and has been in flower every morning during the winter.

Cultivation of Madder.

The cultivation of madder was undertaken by a farmer in Erie county, Ohio, in 1842, and was reported as very profitable. No one seems able to give a reason why its cultivation has been abandoned.

Miss Jessie Thompson will spend the rest of the summer visiting her father and brother at Manistique.

Mr. and Mrs. Abram Cooper and family returned last week from Texas, where they have been living for a year and nine months. They like Ypsilanti better than Dallas and will reside at their old home on Forest avenue.

Nature's Remedy.

NATURAL

MINERAL WATER

—FROM THE—

OWEN MINERAL WELL,

—AT—

Ypsilanti, Michigan,

—AND THE—

DISEASES IT WILL CURE.

This water does not lose its virtue by age. The odors are caused by free gases which in time escape, but their escaping does not in the least deteriorate the virtues of the water. We are thus enabled to ship it in packages of any size, from one gallon to fifty. This water has none of the odors so common to strongly impregnated mineral and sulphur waters. It can be taken to your homes, and if used according to directions will in our belief give equal if not

Better Results!

than any bathing establishment in the world. We do not ask you to go to great expense, either in visiting high-priced sanitariums or securing costly professional treatment, but put our price within the reach of all, and assure the public that home treatment will do the work.

MINERAL WATER

From the Owen Well will cure any case or disease usually treated with Calomel or Mercury, and in small doses, as a tonic, equals Quinine, but does not lead to nor necessitate habitual use.

Skin Diseases

which baffle the Allopathist or Homeopathist are easily handled. All troubles of the digestive or urinary organs are alike cured. Thus we have the

Most Powerful Medicine Known!

Yet, its properties are so nicely equalized it does not create pain in any form, and can be used, full strength, by a child or the most delicate person.

Any person addressing the Owen Mineral Well of Ypsilanti, can precure a pamphlet giving full directions for using this Water for the treatment of the following diseases:

Cholera Morbus or Summer Complaint,
Constipation,
Dyspepsia,
Hay Fever,
Catarrh,
Asthma,
Nervous Debility,
Alcoholism,
Mercurial Poisoning,
Nervous Headache,
Hemorrhoids or Bleeding Piles,
Rheumatism,
Pleurisy,
Neuralgia,
Cancer,
Bright's Disease,
Diabetes,
Erysipelas,
Sciatica,
Milk Leg,
Salt Rheum and all Skin Diseases,
Blood Poisoning,
Bruises, Cuts,
Burns, Sprains,
Mineral Poisons,
Poison Ivy,
Bee Stings, Etc.

ACTUAL TESTS AND TRIALS TO WHICH HUNDREDS OF OUR CITIZENS CAN TESTIFY.

YPSILANTI, JAN. 1, 1885.

T. C. OWEN, ESQ, Forest Ave.

DEAR SIR.—Relative to your inquiries as to my experience in the use of the Owen Mineral Water, I desire to say I have very impartially though thoroughly tested its medical effects and am fully satisfied of its curative properties in many classes of disease. As to its being an universal panacea for all the ills of human life, my experience does not accord with others who look on it as being a cure for everything that effects the body. I have tried to use it in those cases in which both my common sense and medical observation dictated that its use would prove beneficial, I must say in most instances with very gratifying results. I have used it locally in catarrh, goitre, ulcerated sore throat, leucorrhea, prurigo and diphtheria, and in all with decided benefit both internally and as a topical application; its use in hemorrhoids has been very successful. Its effects in unloading the portal circulation and thus relieving the engorged hemorrhoidal veins has been very marked and the more recent the case the more beneficial the results.

There are many more conditions in which I have no doubt its curative properties would be well marked and which would naturally suggest themselves to the physician's mind.

Very respectfully,
EDWARD BATWELL, M. D.

YPSILANTI, AUG. 6, 1885.

T. C. OWEN.

DEAR SIR.—I have suffered from Dyspepsia for twenty years. Indigestion, acidity and the various annoyances incident to that infirmity. I was persuaded to try the water of your well. Having tried ninty and nine remedies with little or no benefit, I began the use of the water without any faith. I found immediate relief. Its use to me is invaluable. I am grateful to the friend who urged me to the trial and am prompted to do all I can to convince others of its value as a remedy. If this letter will serve that end, make what use of it you think best.

REV. DR. L. M. WOODRUFF.

We are now preparing Mineral Salts of our water, for general use, and have gone to great expense in procuring suitable machinery, and hope to have samples ready by August 15.

YPSILANTI, Jan. 15th, 1885.

T. C. OWEN.

SIR.—I have used the water from your well in several cases of skin disease with good effect. In a case of acne indurata that had resisted the usual treatment for several years, was speedily relieved by frequent bathing. I take great pleasure in recommending this water as a valuable remedy in cases of cutaneous eruptions.

Yours Truly, D. A. POST, M. D.

YPSILANTI, OCT, 30th, 1884.

T. C. OWEN.

SIR.—Having been greately benefited by the use of mineral water from your well, I desire to express my gratitude to you in the following manner: I may purchase of you an article without a fixed commercial value and pay a nominal price for it, afterwards it proves of great value to me. Still there is a principle within us, an element called conscience, which speaks and says you are under obligations that can only be discharged by sincere gratitude and expressed by the lips, but when the article is offered and given freely without charge, the obligation is increased and I would not be among the number (if there are such) who quietly neglect to mention the benefit received in the donor's name.

I do not expect to check the advance of age or the ravages of time. Both are surely and steadily pressing upon us with the aches and pains incident thereto, but we will take the Owen Mineral Water and keep comfortable as long as we can.

My ailments have been numerous, viz; dizziness, weakness of the digestive organs, pain in the left side, trouble with the kidneys, sciatica and piles of long standing of about thirty (30) years. The middle of July last I commenced using the Owen Mineral Water. I began with a large draught and it had a chthartic effect. My head and stomach were relieved and I was advised to try it externally and did so, and was relieved of all the aches and pains as above enumerated and hope that I am permanently benefited and will continue the use of the cures.

CHARLES THOMPSON.

YPSILANTI, June 2d 1885.

T. C. OWEN.

Dear Sir.—I have been troubled with hemorrhoids or bleeding piles for sixteen years. The trouble was brought on by heavy lifting in the lumber woods. I was so bad I could hardly do any work. I could not ride in a wagon without a great deal of pain and would at times thoguh keeping very quiet get very weak. About one year ago I came to you, and you gave me three glasses of your Mineral Water to drink and a gallon jug, the next day my pains were gone, and in three days, by using from the jug of water my troubles were all gone, and though a year has passed I have had none of the troubles since. I believe I am entirely cured. I wish to say to anyone reading this letter, who may have any doubts about the cure may come and see me and I will refer them to my neighbors, who have known me for years and have had an opportunety to see and know something of my suffering and I believe if there are any doubts about this wonderful cure it will soon be dispelled.

Yours respectfully,
SAMUEL RUSSELL.

YPSILANTI, May 28, 1885.

T. C. OWEN:

DEAR SIR.—I have suffered with asthma twenty-two years. Eight months ago you told me you thought you could help me, and as I had tried everything that could be heard of, I was willing to try your mineral water as directed, which was at times very severe, but it seemed to have a beneficial effect which was an inducement to continue, so I did continue using hot applications and drinking in natural state, and to my surprise in about three weeks I was enabled to sleep all night and feel refreshed in the morning, which was turning this earth-life from hell into heaven, as I had been twenty-two years without a whole night's sleep, without taking fumes or some narcotic which only gave temporary relief. For two years of the time during the night I was obliged to sit on the floor with a chair to my back, suffering untold agony, but now I go to bead and sleep all night, and though it may not be believed I have no more of those terrible spasms and am perfectly free from symptoms of asthma. I make this statement that anyone suffering from this terrible ailment may try the effects of the Owen Mineral Water, hoping it will have the same result and cure them as it did me.

JOHN KIMBEL.
